About JASA Solutions

JASA Solutions was founded on 20 December 2025 to help students, institutions and businesses turn ideas into practical digital products. The initiative grew out of a student environment, with an emphasis on real project work, mentorship, responsibility and professional delivery.

The team works across web development, mobile applications, content and digital platforms, artificial intelligence and natural language processing, graphic and UI/UX design, and digital marketing. Our approach combines capable student talent with experienced project supervision and disciplined engineering workflows, so that every engagement is delivered to a professional standard and remains maintainable after handover.

Vision

To build a student-centric organization that empowers people with practical digital skills, real project experience and meaningful career opportunities.

Mission

- Support students through practical learning and mentorship.
- Deliver useful, maintainable digital solutions for organizations and businesses.
- Bridge academic learning with real-world software development.
- Create pathways from internships and project work into professional opportunities.

Core Capabilities

Six practice areas, delivered by one coordinated team. Most engagements draw on more than one.

CAPABILITY	EXPERIENCE & FOCUS
Web Development	Modern responsive websites, institutional portals, CMS-style systems and custom web applications.
Mobile Development	Android application development, API integration, and offline-capable reading and content delivery.
AI & NLP	Natural language processing, language tools, translation and transliteration, speech technology and applied AI.
Digital Libraries & Platforms	Book catalogues, metadata management, online reading, file storage and administrative panels.
UI/UX & Graphic Design	User-focused interfaces, visual identity systems, social media and project design assets.
Digital Marketing & Content	Digital presence, content publishing, and online visibility and growth support.

Engagements are scoped in writing before work begins, built in reviewable stages, and handed over with source files, administrative access and documentation. Section 05 sets out the delivery process in full.

Team & Project Roles

JASA Solutions operates through a student-led team structure. Members contribute according to project requirements across management, development, project coordination, mentoring, design and marketing, with additional specialists brought in as a project's scope requires.

NAME	ROLE
Jansher Ameer	Founder / CEO
Mukhtar Moosa	Project Team
Ayesha Majeed	Project Team
Shah Bakhsh	Project Team
Pazeer Ahmed	Project Team
Inam Noor	Project Team
Usman Fateh	Project Team
Chiragh Jan Shamin	Project Team
Minhaj Assa	Project Team

Individual role titles and primary contributions for each team member are confirmed per engagement and can be provided, together with member profiles and CVs, on request.

Selected Project Experience

The following projects represent selected work undertaken by JASA Solutions and its student project team. The list is presented as project experience and does not imply that every project was delivered under a single contractual arrangement.

01 CAO.org.pk

Website project developed for an organizational and institutional online presence, with a focus on clear information presentation and responsive access across devices.

WEB DEVELOPMENT · RESPONSIVE UI · CAO.ORG.PK

02 BELI.org.pk — Balochistan Emerging Leaders Initiative

Website and digital platform work supporting institutional information, programs, youth initiatives and organizational communication for a youth development organization.

WEB DEVELOPMENT · INSTITUTIONAL PLATFORM · CONTENT MANAGEMENT · BELI.ORG.PK

03 DrFidaAhmed.com

Personal and professional website designed to present profile information, work, publications and related online resources in a clear academic format.

WEB DEVELOPMENT · PROFESSIONAL WEBSITE · DRFIDAAHMED.COM

04 GRASP Platform

Web platform associated with Dr. Fida Ahmed, developed as a dedicated digital project under the GRASP domain.

WEB APPLICATION · PLATFORM DEVELOPMENT · GRASP.DRFIDAAHMED.COM

05 Shad Academy

Education-focused website project supporting online institutional presence and digital information delivery for an academic organization.

EDUCATION WEBSITE · WEB DEVELOPMENT · SHADACADEMY.COM

06 Bargain Bears — United Kingdom

E-commerce and online business website project delivered for a UK-based business, covering product presentation and customer-facing web experience.

E-COMMERCE · BUSINESS WEBSITE · BARGAINBEARS.CO.UK

Applied Technology Projects

07 Next Word Predictor for Microsoft Office

An applied language technology project focused on next-word prediction and contextual writing assistance inside Microsoft Office, exploring language modelling and productivity-oriented NLP.

AI · NLP · MICROSOFT OFFICE ADD-IN · C# / .NET

08 Hopela School Management & Official LMS

School technology project covering administrative management functions and an official learning management system supporting digital administration and learning workflows.

SCHOOL MANAGEMENT · LMS · WEB DEVELOPMENT

09 Zobáanganj AI Platform

A Balochi language technology platform built around practical AI and NLP tools, including Latin-script to English and English to Latin-script translation, Arabic-script to Latin-script transliteration and reverse, speech-to-text, text-to-speech, spell checking and Balochi language resources.

BALOCHI NLP · TRANSLATION · TRANSLITERATION · STT / TTS · SPELLCHECKER ·
ZOBANGANJ.TECH

Why organizations work with us

- **Regional understanding.** Direct experience with institutions, academies and organizations working in Balochistan and Pakistan.
- **Language technology capability.** Practical Balochi NLP work — translation, transliteration, speech and spellchecking — that few teams in the region offer.
- **End-to-end delivery.** Web, mobile, design, content and marketing handled by one coordinated team.
- **Transparent, documented process.** Written scope, staged review, and full handover of accounts and source material.
- **Accessible pricing with mentorship oversight.** Student-led cost structure with technical supervision on quality.

How We Work

Every engagement follows a structured delivery process, scaled to the size of the project. The intention is that clients always know what is being built, what stage it is at, and what they will own at the end of it.

STAGE	WHAT IT INVOLVES
1. Discovery & Requirements	Understanding objectives, users, content and constraints, followed by a written scope and timeline.
2. Design & Structure	Information architecture, interface design and review of layouts before development begins.
3. Development	Implementation in short, reviewable stages with regular progress updates to the client.
4. Testing & Review	Functional testing, responsive and device checks, content review and client feedback rounds.
5. Deployment	Hosting and domain setup, publishing, and configuration of administrative access.
6. Handover & Support	Admin training, documentation, source and account handover, and an agreed support period.

Organizational & Registration Status

Business status. JASA Solutions was founded on 20 December 2025 and currently operates as a student-led software development initiative. At the date of this document, the firm has not yet completed formal company registration, and no registration certificate or registration number is represented in this profile. This document therefore presents the organization transparently as a student-led professional project team. Should formal registration be completed, those details will be added to subsequent versions of this profile.

Supporting Information

Available on request

- JASA Solutions website and public portfolio references.
- Project screenshots, demonstrations or live links for selected completed projects.
- Relevant project proposals and scope documents.
- Team member profiles and CVs.
- Identification and contact information of the responsible project representative.
